

# Manuel Almagro Rivas

## INTEGRATION CONSULTANT

### Profile

Integration consultant with hands-on experience designing, building, and operating cloud integration solutions. Specialised in SAP Integration Suite, BTP and S/4HANA Cloud, with a strong foundation in API design, messaging protocols, and resilient integration patterns. Delivered core integrations running in production with near-zero downtime since go-live. Experienced working in international and English-first teams (Cambridge CPE, C2). Working towards an integration architect role.

### Experience

2023 - present

#### ***SAP Integration Consultant***

Avvale Spain

Project experience includes:

- Designed and delivered end-to-end integration solutions tailored to functional, business, and scalability requirements; core custom integrations have run in production with near-zero downtime and exceptions since go-live.
- Led automation of complex business processes, reducing manual effort and improving operational reliability for clients.
- Migrated custom and standard integration processes from on-premise legacy systems to SAP BTP cloud solutions, ensuring continuity and improved maintainability.
- Reviewed and aligned existing integration landscapes with industry best practices, including end-to-end documentation and standardisation across environments.
- Set up end-to-end monitoring and alerting across S/4HANA, Master Data Integration, Cloud ALM, and Integration Suite, reducing mean time to detection of integration failures.
- Delivered integration training sessions (theory and hands-on exercises) to clients and colleagues on best practices, monitoring, alerting, housekeeping, and transport management.
- Resolved integration incidents within defined SLAs in fast-paced consulting environments, maintaining service continuity for production systems.

- Produced technical designs, effort estimates, and project documentation to support delivery teams and client stakeholders.

## Technical skills

### General integration knowledge

- Message mapping (XML via XSD/WSDL, JSON, IDOC, EDI, CSV...)
- Authentication methods: Basic, OAuth 2.0, client certificate-based, JWT, API Key, CSRF...
- API testing and debugging (REST, SOAP, OData)
- Best practices, resilient and maintainable integration patterns

### APIs

- REST & SOAP API Development
- Extensive OData (V2, V4) API experience
- GraphQL API knowledge
- SAP Environment tools: BAPIs, CDS views, CBOs
- OpenAPI/Swagger experience.

### Scripting & programming

- Development and scripting in Groovy and Java.
- Bash scripting in UNIX-like environments (macOS, Linux).
- Also used frequently in the past: Python, R, C++, Fortran, Mathematica, Lua.

### Platform & Infrastructure

- Management and administration of DNS, domains, reverse proxies and hosting services
- Basic system administration tasks in Linux
- Administration and maintenance of FTP/SFTP services
- Issuance, renewal, and automation of SSL/TLS certificates
- Operational management of databases
- Use of Docker for the creation, deployment, and basic management of containers
- Operational knowledge of public key cryptography (PKI): certificates, keystores, hash algorithms, sign requests, trust chains...

## Technologies

### SAP Integration

- SAP Integration Suite: Cloud Integration, API Manager, Event Mesh, Log Viewer
- SAP BTP, Cloud ALM, SAP Cloud Connector
- S/4HANA Cloud (Public Edition), ECC, SuccessFactors, Cloud for Customer, Customer Data Cloud, Ariba, Concur, Emarsys, Master Data Integration

### Databases & tools

- Microsoft SQL Server, HANA, MariaDB
- Postman, Bruno, SoapUI
- Docker
